

# ARID PLANTS

## LES PLANTES DES ZONES ARIDES

### PLANTAS DE ZONAS ÁRIDAS

☞ Arid or desert plants are some of the toughest species you will find. They have evolved to survive in climate zones with harsh winds, intense heat and only very sporadic precipitation. They typically store what little moisture they can attract in plump pods and save it for... well, not a rainy day, but long dry spells instead. Radiant flowers help them attract pollinators, giving them an edge over any competition in their surroundings.

☞ Les plantes des zones arides ou désertiques comptent parmi les espèces les plus résistantes qui soient. Elles ont évolué pour survivre dans des zones climatiques caractérisées par des vents violents, une chaleur intense et des précipitations très sporadiques. Elles stockent généralement le peu d'humidité qu'elles peuvent absorber dans des gousses dodues et la conservent pour de longues périodes de sécheresse. Des fleurs éclatantes leur permettent d'attirer les pollinisateurs, ce qui leur donne une longueur d'avance sur la concurrence dans leur environnement.

☞ Las plantas de zonas áridas o desérticas son algunas de las especies más resistentes que encontrarás. Han evolucionado para sobrevivir en zonas climáticas con vientos inclementes, calor intenso y precipitaciones muy esporádicas. Normalmente almacenan en gruesas vainas la poca humedad que pueden captar y la guardan para... Bueno, no para los días de lluvia, sino para largos períodos de sequía. Sus radiantes flores les ayudan a atraer a los polinizadores con ventaja sobre cualquier competencia presente su entorno.

*(Dudleya brittonii)*

**BRITTON'S LIVEFOREVER**

A succulent native only to Baja California, Mexico.

**LE DUDLEYA DE CRAIE**

Une succulente originaire de Basse-Californie, au Mexique.

**SIEMPREVIVA DE TIZA**

Una suculenta nativa solo de Baja California (México).

*(Opuntia humifusa)*

**EASTERN PRICKLY PEAR**

A cactus native to large parts of the eastern United States and northeastern Mexico.

**LE FIGUIER DE BARBARIE ORIENTAL**

Un cactus indigène à une grande partie de l'est des États-Unis et du nord-est du Mexique.

**NOPAL DEL ESTE**

Cactus originario de gran parte del este de Estados Unidos y el noreste de México.

*(Mammillaria crinita  
f. zeilmanniana)*

**PINCUSHION CACTUS**

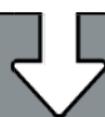

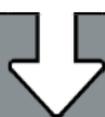

Native to Mexico, and areas in the southwestern United States, the Caribbean and South America.

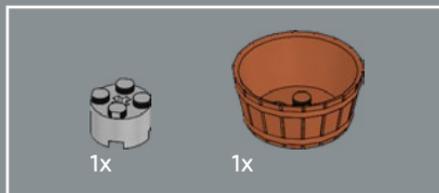

**LE CACTUS PELOTE**

Un cactus indigène au Mexique et dans les régions du sud-ouest des États-Unis, des Caraïbes et de l'Amérique du Sud.

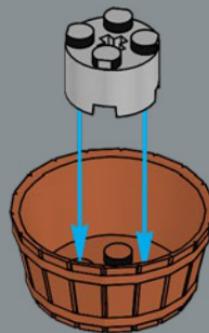

**BIZNAGA DE ESPINAS ÁUREAS**

Originaria de México y zonas del suroeste de Estados Unidos, el Caribe y Sudamérica.

This colorful succulent was named after Nathaniel Lord Britton, an American botanist who first categorized the *Dudleya* genus.

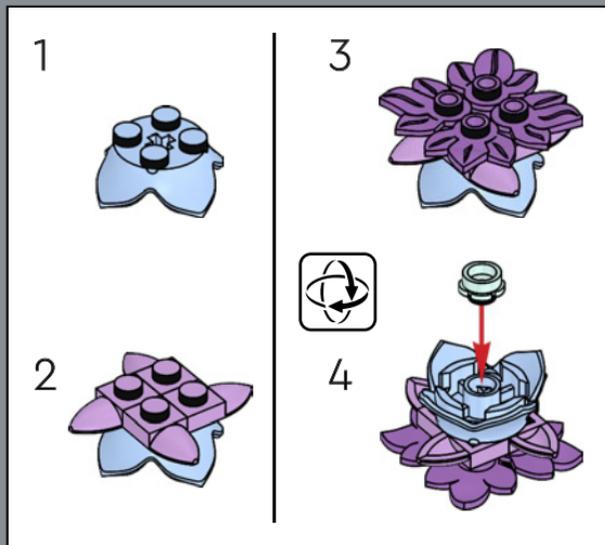

Cette succulente colorée a été nommée d'après Nathaniel Lord Britton, un botaniste américain qui a été le premier à catégoriser le genre *Dudleya*.

Esta colorida suculenta debe una parte de su nombre científico (*Dudleya brittonii*) a Nathaniel Lord Britton, botánico estadounidense que clasificó por primera vez el género *Dudleya*.

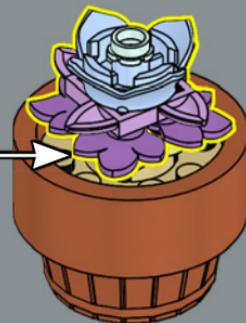

7

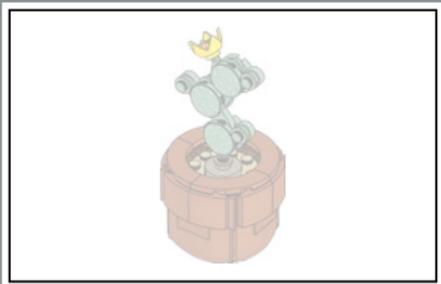

To capture a nice gradient of spiky leaves, we added a new color for the 1x1 plate with a tooth. So, if you have any LEGO® animals in your house, you could always give them lovely light lavender teeth.

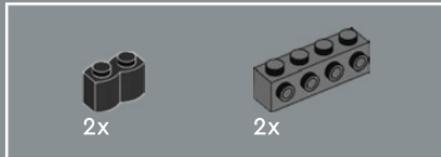

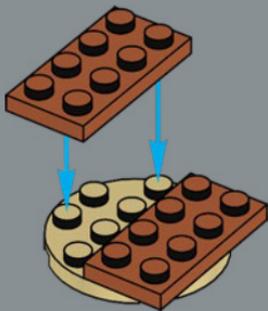

Pour obtenir un joli dégradé de feuilles épineuses, nous avons ajouté une nouvelle couleur à la plaque 1x1 avec une dent. Ainsi, si vous avez des animaux LEGO® dans votre maison, vous pouvez toujours leur donner de jolies dents couleur lavande pâle.

Para reproducir un bonito gradiente de hojas puntiagudas, añadimos un nuevo color a la placa 1x1 con un diente. Así que, si tienes algún animal LEGO® en casa, tendrás la opción de ponerle unos preciosos dientes de color lavanda claro.

The round printed 2×2 LEGO® tiles are in a new sandy green color and feature a fun new spiky deco to capture the look of an Eastern prickly pear.

Les tuiles LEGO® rondes imprimées 2×2 sont d'une nouvelle couleur vert sable et présentent un nouveau motif épineux pour reproduire l'aspect du figuier de Barbarie oriental.

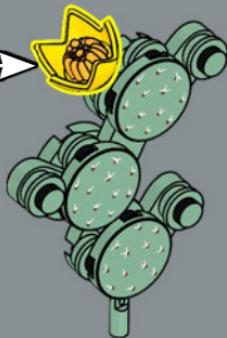

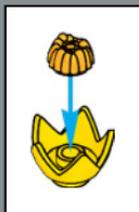

Las cubiertas LEGO® redondas 2×2 con estampado vienen en un nuevo color verde arena y presentan una nueva y divertida decoración con picos para capturar el aspecto de un nopal del este.

15

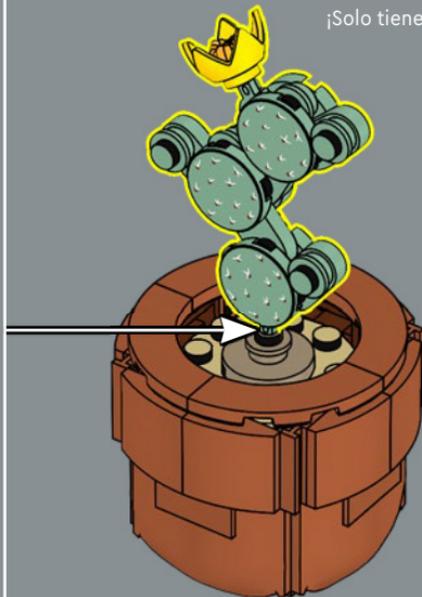

16

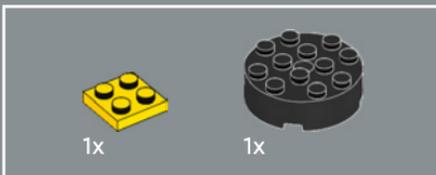

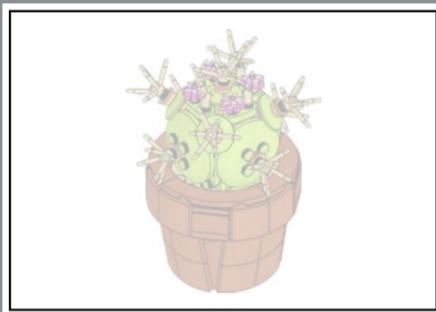

17

Did you know that prickly pear fruit is edible?  
And so are the big green 'pads.' Just be sure  
to remove the spines before eating!

Savez-vous que les fruits du figuier de Barbarie  
sont comestibles ? Il en va de même pour les gros  
« coussinets » verts. Veuillez simplement à retirer les  
épines avant de les manger !

¿Sabías que el fruto del nopal es comestible?  
Y también lo son sus grandes "hojas" verdes.  
¡Solo tienes que quitarles las espinas antes de comerlas!

Several species of pincushion cactus grow a lovely crown of flowers in vivid colors.  
Plusieurs espèces de cactus pelote produisent une belle couronne de fleurs aux couleurs vives.

De varias especies de cactus crecen hermosas coronas de coloridas flores.

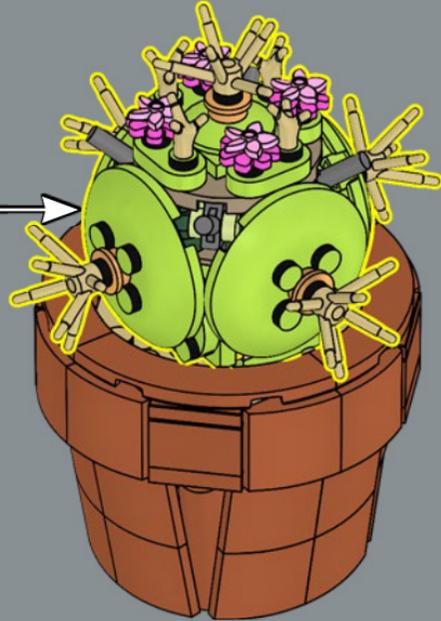

35

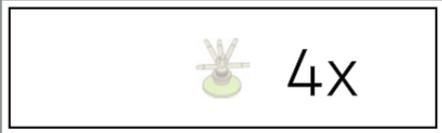

36

After being catalogued for the first time in the late 1920s, *Mammillaria crinata f. zeilmanniana* was largely unknown, until it was rediscovered in 1988 within a specific canyon area in Mexico.

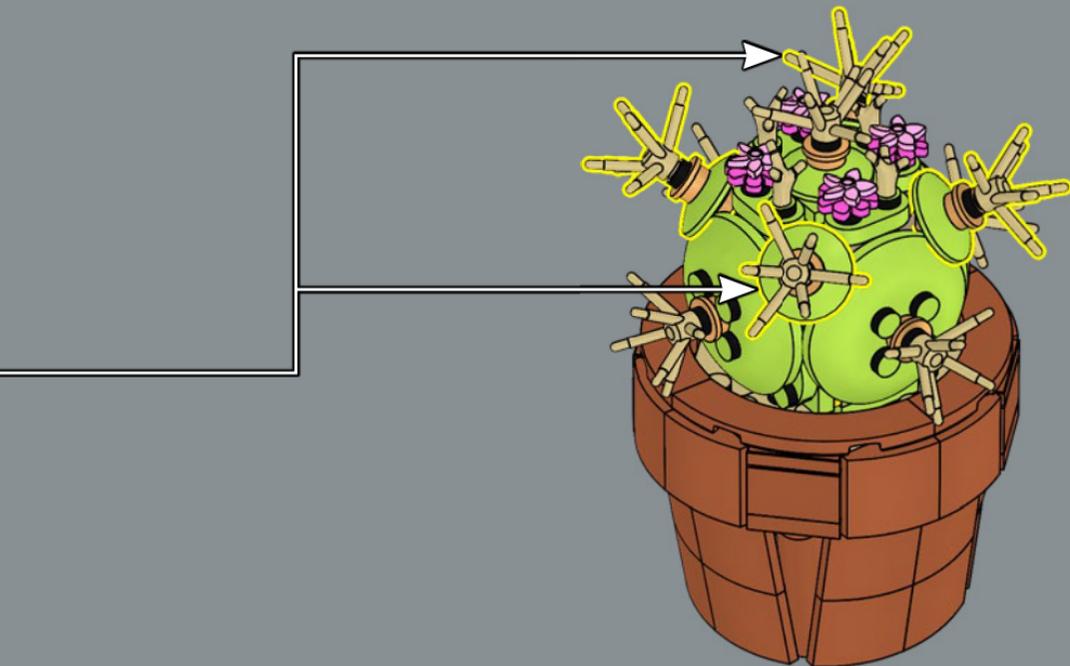

Après avoir été cataloguée pour la première fois à la fin des années 1920, la *Mammillaria crinata f. zeilmanniana* est restée largement inconnue, jusqu'à ce qu'elle soit redécouverte en 1988, uniquement dans une zone spécifique d'un canyon au Mexique.

Poco se supo de la *Mammillaria crinita f. Zeilmanniana* luego de que fuera catalogada por primera vez a finales de la década de 1920. Mucho tiempo después, en 1988, fue redescubierta solo en una zona específica de un cañón en México.
